Statement melamine contamination in milk

The import of milk powder from China into Europe is prohibited by COMMISSION DECISION 2002/994/EC of 20 December 2002 concerning certain protective measures with regard to the products of animal origin imported from China as amended.

Neither do we import cocoa or chocolate products from China.

Therefore we can confirm that:

- no Chinese milk powder has been used in our production sites in Europe
- no melamine contaminated milk powder has been used in our products
